Clean carbon

ABOUT US

Carbon Marketing & Brokerage

Carbon Equities New Zealand Limited is an environmental equities investment company. We have eight years experience as carbon brokers in the New Zealand Emissions Trading Scheme and three years in the voluntary carbon market. We operate the International Registry of High Integrity Credits to provide the market with absolutely genuine voluntary credits

Science & Technology

GreenXperts Limited is a New Zealand-based environmental services company focused on excellence and innovation. We have 35 years experience in sustainability science and 18 years experience with the New Zealand Emissions Trading Scheme. We operate globally with the GreenXperts' Network of 3,000+ professionals

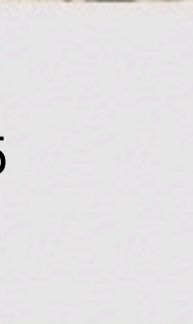

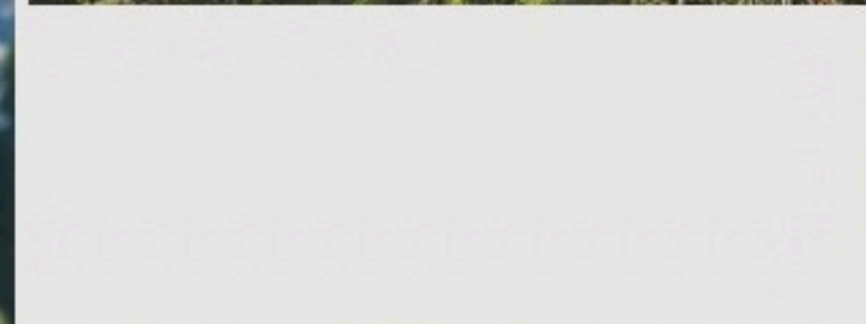

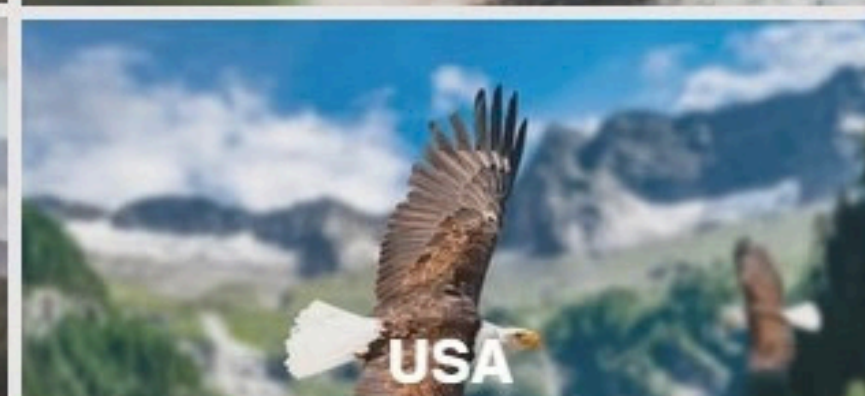

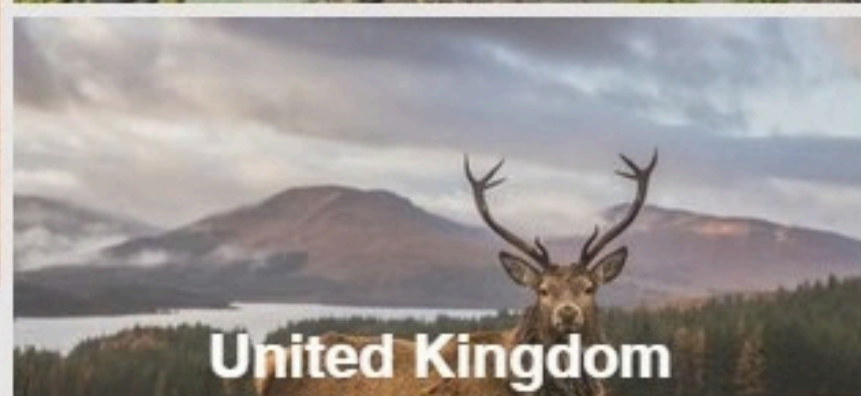

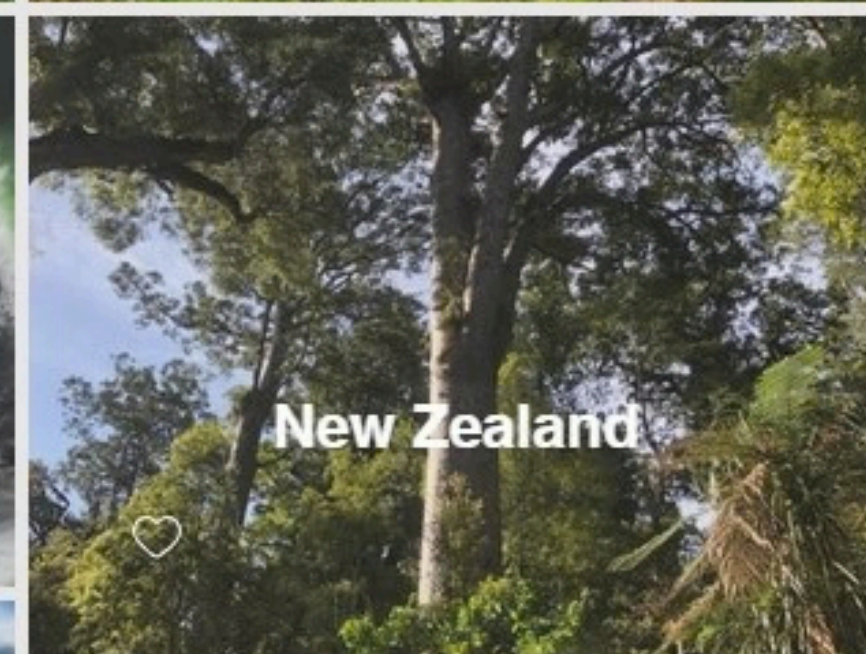

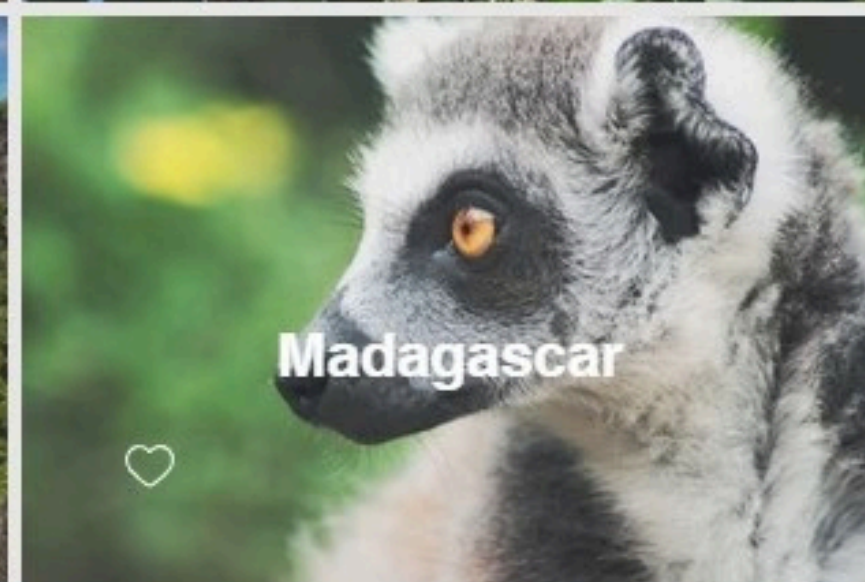

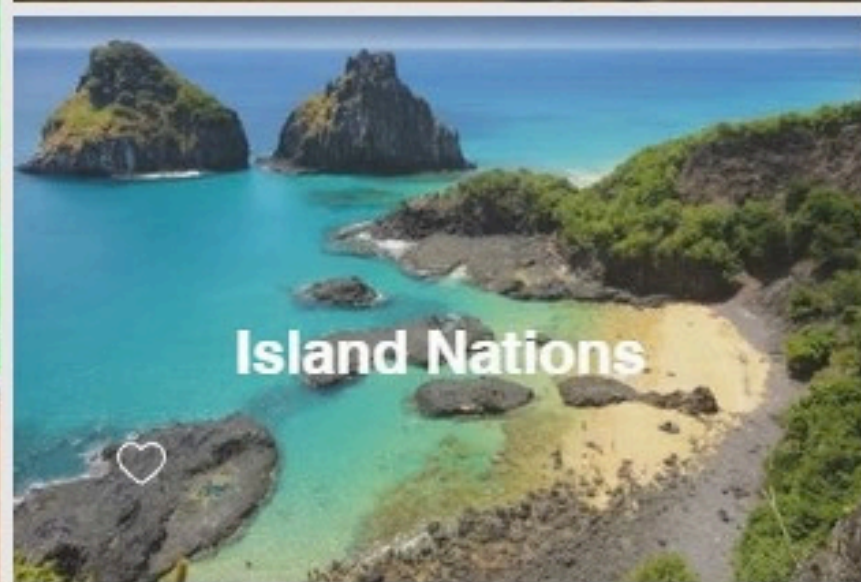

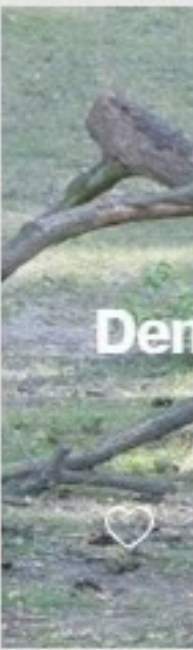

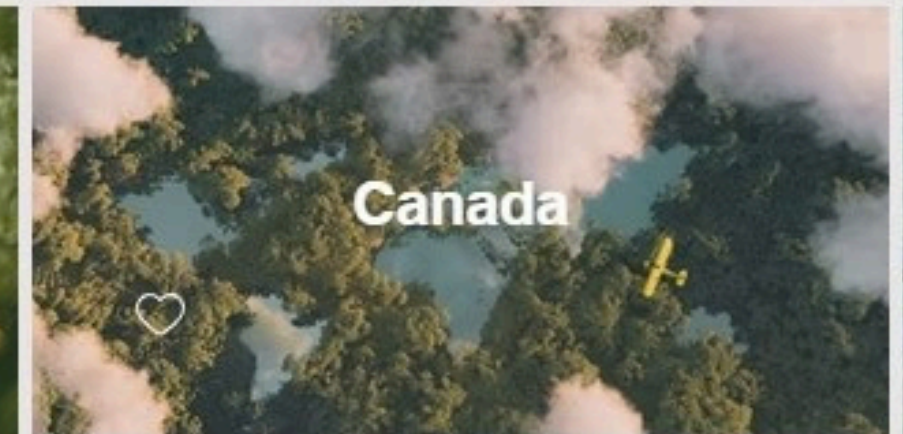

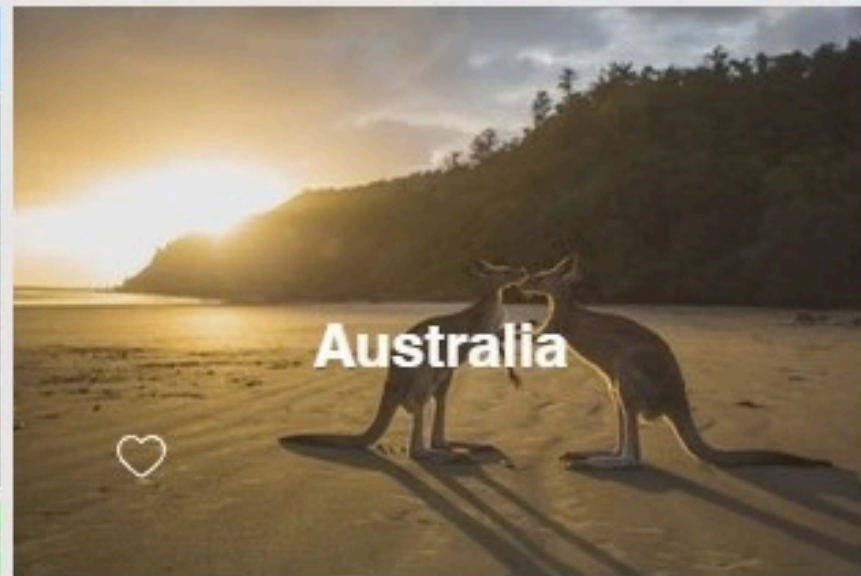

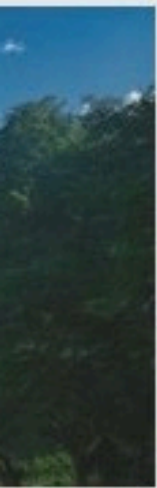

Lead – Africa

Futures Agribusiness LLC, based in the USA and Africa, has a 35 year track record bringing robust agribusiness projects to Great Green Wall countries in Africa. They approached Carbon Equities New Zealand to help them provide clean carbon services to African communities. They are our Lead Africa project managers and liaison officers

SUMMARY

- **Problems:**

- Historically most voluntary carbon credits fake
- Critical lack of supply of high integrity credits for Article 6.2 ITMO, CORSIA compliance, and private markets
- Current voluntary market supply quality still questionable. No place to find absolutely clean carbon

- **Solution:** Create a dedicated credit authentication pathway and sales platform with no fake content. Clean carbon only. Full solution being the [RENA™ Scheme](#) and world's first [International Registry of High Integrity Carbon Credits](#). Source credits from authenticated suppliers worldwide

- **Target:** 150M+ global supply of clean carbon on the Registry by 2027. Sell direct, on-line, or by auction. Current supply 3.19M credits. Pipeline 32M

GLOBAL PROBLEM

Fake Environmental Equities:

- Voluntary Carbon Credits
- Blue Carbon Credits

First exposed by Guardian Newspaper & Oxford University in [2023](#). Most credit reputations and prices have crashed since. Governments and Industry still need genuine voluntary credits to help them decarbonise. Critical lack of quality supply. No outstanding source of absolutely clean carbon

Note: "Clean carbon" means credits are sourced from a scheme or methodology that has never been discredited. Credits meet real, additional, material, and permanent (100 years +) carbon storage criteria on a proper life-cycle basis. Verifier and validator are different organisations

MARKET DRIVERS

19th Century Policy

21st Century Policy

DIRTY CARBON RISKS

- Legal
 - Paris Climate Agreement Obligations - Net Zero by 2050
 - National Climate and Fair Trading Laws
- Reputational
 - Growing influence of Gen X, Y, Z consumers
 - Stakeholder Interests
 - Shareholder Pressure
- Trading
 - Market Access
 - Carbon Tariffs
 - Competitor Positioning

GLOBAL SOLUTION - CLEAN CARBON

Create the world's most premium collection of high value, high integrity voluntary biodiversity and carbon credits by:

- Creating a scientifically-sound Voluntary Credit Authentication Scheme based on proven ISO Greenhouse and New Zealand Government Voluntary Standards - [RENA™ Scheme](#)
- Creating a dedicated [International Registry of High Integrity Carbon Credits](#) and sales platform with no fake content
- Inventing or adopting [NZ-XRB](#) or [EU-compliant](#) authentication protocols
- Sourcing from authenticated trustworthy suppliers world-wide
- Paying a community revenue share of >60% in Least Developed Countries. Community Development Plan and Co-Benefit Packages deployed using carbon revenue. Transparent long-term site and satellite monitoring
- Presenting credits as an impeccable new offering for Emitters: **High Integrity Trophy (HIT)** credits that help reduce climate change, meet Net Zero targets, restore and expand carbon sinks and rare habitats, and genuinely benefit communities

EQUITIES OFFERED

- **VVCC®** - Voluntary Vintage Carbon Credits from Pre-1990 forests
- **VRCC™** - Voluntary Restorative Carbon Credits from Post-1989 forests
- **BOLD™** - Biodiversity Credits from full species replanting and restoration of denuded habitats
- **BCC™** - Blue Carbon Credits from marine or freshwater environments
- **VCCW™** - Voluntary Carbon Credits from wetlands, peatlands, and other natural environments
- **VCPT™** - Voluntary Carbon Credits from nature-based proven technologies, eg. hydro power, solar and wind power

TRANCHE SUMMARY - AFRICA

FOREST	LOCATION	STATUS	ANNUAL CREDITS
Baies de Loza	Madagascar	LOA pending, Authentication underway	340,351
Bealanana	Madagascar	LOA pending, Authentication underway	478,345
Businga	Democratic Republic of Congo	LOA held, Authentication underway	972,132
Delta de Tsiribihina	Madagascar	LOA pending, Authentication underway	255,897
Kotakoli	Democratic Republic of Congo	LOA held, Authentication underway	662,574
Lokoho	Madagascar	LOA pending, Authentication underway	160,316
Marojejy	Madagascar	LOA pending, Authentication underway	324,312
Nosy Lava & Nosy Ilanga	Madagascar	LOA pending, Authentication underway	316,544
TOTAL			2.691,775

Key: LOA Letter of Authorisation from National Government
